ABOUT ME

• Electronics and Communication graduate from IIT Delhi with 6+ years of experience as a software developer and team lead. • Currently leading a key vertical at Pasarpolis for the past 1.5 years, managing the most trusted and revenue-generating unit. This vertical has its own backend stack and iOS, Android and web app. • Career spans both startups (3+ years) and large corporations like Amazon, Nykaa, and Bosch, providing a balanced perspective on speed, scalability, and customer focus. • Technical expertise includes software design and development, project management, estimating efforts, breaking down tasks and ensuring quality of the deliverables. Additionally, my UPSC preparation has reinforced understanding of engineering ethics and professional values.

EXPERIENCE

2023 – Current
Full Time/(0.5 Years)

Team Lead

PT. Pasarpolis Indonesia

• Designed and onboarded three new insurance products for the App. • Improved the performance and reliability of wallet service. • Took initiatives to reduce the overall tickets coming for the vertical by identifying the pain points. • Identified the UI improvement tasks, tech debts to improve the overall user experience and reliability.

Project Management / Design / User Experience / Reliability / Code Reviews

2022 – 2023
Full Time/(0.5 Years)

Back-End Developer

Nykaa

• Worked on the critical service that renders widgets on all Nykaa pages, thereby getting exposure to problems of scale and volume. • Improved the reliability and added quick issue detection for the flow that does revenue attribution on the shown ads. • Implemented application side caching to reduce the response time and reduce the cost of Redis. • Having ownership of UPs Service that holds personalisation data for all Nykaa users.

Flask / NoSQL / Big Data / AWS / Scale

2021 – 2022
Full Time/(1.8 Years)

Back-End Developer

PT. Pasarpolis Indonesia

• Handling the core services of app that enables agents to compare and book insurance policies for their customers, for vehicle, property, gadgets, health etc online. • Having ownership of commission-service, which is responsible for deciding the agent-commission amount and disbursing commission for the policies booked. • Designed and developed the tax module for the app, invoice and receipt generation module, policy-endorsement and other components that are handle critical financial transactions. • Providing guidance and mentorship to the junior members of the team.

Python / Django / MySQL / Git / Microservices / GCP / REST API

2017 – 2018
Full Time/(0.5 Years)

Back-End Developer

Amazon India Pvt. Ltd.

• Maintained, improved, scaled/de-scaled Gateway Service and Search and Discovery Service for Amazon Appstore. • Decoupled the Gateway Service from various dependencies so that it can be refactored from a service to a library, which could be used by downstream services, and eventually lead to an estimated annual savings of 4m USD in host machines because of uniform load distribution.

Java / Git / Linux / AWS / Spring

2014 – 2017
Full Time/(3 Years)

IoT Developer

Robert Bosch Engineering & Business Solutions Pvt. Ltd.

• Designed and implemented a method for OTA diff upgrade for a low storage capacity devices. • Implemented an emergency alert system in automobiles that was triggered by user or an event. • Designed an application to form a economic Xbee network for automated agricultural field monitoring and maintenance. Also created a library for the Xbee protocol and exposed APIs for easy interfacing with controllers.

C / Java / Hardware Interfacing / Python / Embedded Systems

2015 – 2016
Full Time

Healthcare Devices Development

Robert Bosch Engineering & Business Solutions Pvt. Ltd.

• Did complete design of hardware and development of software for POC handheld Blood Potassium monitoring device that could tell the blood potassium level much like a blood glucose meter for diabetics.

C / Electronics / Electrochemistry / Embedded Systems / Product Development

2017 – 2018

Miscellaneous

Robert Bosch Engineering & Business Solutions Pvt. Ltd.

- Designed and developed a library with wrapper layer that abstracted the driver layer and exposed APIs to easily configure the dot matrix LCD display that displayed mobile like menu screen and screens to take alpha-numeric inputs on a device that only had navigation keys.
- Designed an application using Python that read data from Flash storage of controller and transferred it to PC via COM-Port.

C / Python / Embedded Systems

EDUCATION

2010 – 2014

Bachelor's Degree in Electronics and Communication

Indian Institute of Technology Delhi

- Got a category rank of 174 in IIT-JEE 2010 where close to 5 lac students appeared in examination.
- Passed out with CGPA of 6.9 overall with knowledge in wide spectrum that included that in Computer Science, Mathematics, Psychology and Safety in Engineering.

Up till 2010

Secondary and Higher Secondary

St. Joseph's Public School, Dalsinghsarai

- Consistently obtained first rank in the class all through middle and high school.
- Got AIR 162 in National Science Talent Search Examination and got selected for final interview in NTSE conducted by Govt.
- Got 95% and 85% in 10th and 12th board examination respectively.
